LIGHTWEIGHT LEATHER + STANDARD FINISH
(Chrome)

At Pangea, our mission is to take what nature has created and preserve it. Enhance it. Make it useful and beautiful. Our line of Advanced Products does just that.

Using proven tanning and finishing processes, we have crafted a stunning new range of automotive leather solutions.

Inspired by the natural world, Pangea's Advanced Products are the perfect canvas to create unique luxury products that amaze and inspire.

Pangea Terova

Lightweight. Durable. Natural strength imbued with unmistakable beauty.

Terova is a lightweight product that helps reduce vehicle weight while remaining extremely durable, with improved light and heat resistance.

Estimates show vehicle leather weight can be reduced by up to two pounds per vehicle using Terova leather. And by contributing to lower vehicle mass, the CO₂ emissions footprint over the vehicle's life, as well as its entire supply chain, are reduced.

Chemistry (beamhouse +tan + retan + finish)

1.26 kg of chemicals/m²

Emissions From Energy Consumption

0.55 kg CO₂e/m²

Waste Management

Same as traditional leather
